## **Construction Detour Notice**

Southeast Roadbuilders is collaborating with the Haines Borough and proHNS for the Small Tracts / 3<sup>rd</sup> Avenue / Mudbay AC Pipe Replacement Project, which began June 22<sup>nd</sup>. The scope of this project includes replacing the existing asbestos cement (AC) water pipe with new high density polyethylene (HDPE) water pipe, poly water services, valves, hydrant assemblies, and other water system improvements.

To protect the safety of our crew and the public, detours will be in effect starting July 6<sup>th</sup> to divert vehicle and pedestrian traffic around the work zone in two different stages. The first stage will reroute traffic around the work zone from Major Road to Tower Road. This will be done through signs and traffic control devices along Ed Shirley Dr, Second Ave, Mud Bay Rd and FAA Rd. The second stage will reroute traffic around a portion of Small Tracts Rd. Traffic will be diverted through Mudbay Rd and around to Small Tracts Rd.

Residents, commercial vehicles, and emergency services will have access to residences in work zone via single lane. Direction of travel for this lane will depend on the location of the crew along the project. Direct waterline tie-ins in front of driveways may result in delay or temporary access solutions.

The first stage will be implemented immediately upon detour setup and public notice will be given prior to the second stage or any other major changes to traffic patterns due to this project. The Project deadline is September 30, 2020.

For further information or questions please call the Project Hotline @ 907-314-0680.

Thank you
